

11 College Information System

A centralised approach of system for managing accessing, storing & updating all info and details present in relevance to students & teaching & non-teaching faculty, increase efficiency & convenience of info management in Institute.

→ SRS:

- 1) They should be able to add, edit & new student personal details, like name, age, gender, email, address & so on.
- 2) They should be able to view & edit student academic details like UAN, dept, sem & courses.
- 3) Faculty should be able to view all student info & should be able to edit the cie marks & attendance.
- 4) The COE office shall be able to edit all student details & cie marks & publish results.
- 5) Placement section should be able to view all std details & add companies coming to the campus.
- 6) Management section should be able to view, add & edit teaching staff details.
- 7) Student data should be allowed to edit their personal info & academic details.
- 8) The system should be convenient & easy to use by students, management & faculty.
- 9) The system should be reliable source of info viewing for stds, COE, & faculty.
