

## 2) Hostel Management System:

The purpose of this is to carry out diff operations of a hotel. This system will provide ease, comfort of use to the staff of the hotel by performing all work on computer. It helps manage all records.

- 1) Admin can login using his personal credentials.
- 2) Admin can allot room to students.
- 3) Students can login using the credentials & can give feedback about staff. Can be reviewed by admin.
- 4) Students can provide mess feedback & mess managers can review the feedback & update the menu.
- 5) Admin can assign work to staff members.
- 6) The system should be easy to handle, with good performance & good response time.

### Problem Statement

The various hostel operations can be difficult to maintain. The facilities are to be monitored & recorded, these details can be in an organised way in the online system.
